

LightBound Managed Server Services

LightBound provides a comprehensive range of solutions for today's eBusinesses.

Many companies are outsourcing the administration and management of their virtual server needs to LightBound

Infrastructure as a Service

We understand that procuring shared storage and new server infrastructure in a highly available and fully replicated grid is exceedingly costly, thwarting the very savings your business is attempting to enact through server virtualization and consolidation.

The cost of hiring qualified Systems Administrators is also growing. Retaining quality people is even more difficult. What's more, security and disaster recovery preparation for your critical systems is extremely costly and very inefficient.

You Manage Your Servers: Let Us Manage the Infrastructure

We have the technical expertise to manage your virtual server needs; whether a single virtual machine, or your entire enterprise.

Our Virtual Server Services are perfect for companies that need high performance and highly available virtual servers for their consolidation and virtualization projects. No capital investment is needed. LightBound will provide, own and manage the equipment, building the future for a long term business relationship.

Easy to Use Services

LightBound Virtual Server Services is custom tailored to each client with their specific needs and budget in mind. We take the burden of keeping your Infrastructure operating at peak efficiency and ensuring your virtual servers are secure and available.

Service, Support and Security

Providing quality service is very important to us. LightBound can manage:

- Virtual Server Provisioning
- High Availability & Fault Tolerance
- Snapshot Capability
- Customer Portal with:
 - Performance Metrics
 - Change Control
 - Asset Control
- Deep Packet Inspection with:
 - Stateful Firewall
 - IDS/IPS
 - Enforced Policy Governance
- 24x7 NOC Coverage

Affordable

LightBound makes Virtual Server Services affordable, no matter how big or small. Don't be left behind, let us work with your company to help build, manage and grow your critical system needs.
