

LightBound Storage Services

LightBound provides a comprehensive range of solutions for today's eBusinesses.

Many companies are outsourcing the administration and management of their storage needs to LightBound

Fully Leverage Server Consolidation Cost Savings

We understand that procuring shared data storage in a highly available and fully replicated grid is exceedingly costly, thwarting the very savings your business is attempting to enact through server virtualization and consolidation.

The cost of hiring qualified Storage Administrators is also growing. Retaining quality people is even more difficult. What's more, disaster recovery preparation for your critical data is extremely costly and very inefficient.

You Manage Your Servers: Let Us Manage the Storage

We have the technical expertise to manage your storage needs; whether a single 100GB LUN, or Terabytes of fully backed up and replicated storage.

Our Storage Services are perfect for companies that need highly available and replicated shared storage for their server consolidation and virtualization projects. No capital investment is needed. LightBound will provide, own and manage the equipment, building the future for a long term business relationship.

Easy to Use Services

LightBound Storage Services is custom tailored to each client with their specific needs and budget in mind. We take the burden of keeping your uptime operating at peak efficiency and ensuring your storage is secure and available.

Service, Support and Security

Providing quality service is very important to us. LightBound can manage:

- Critical Production Storage
- Information Lifecycle Management
- Storage Archival
- Full Snapshot Capability
- Real-Time Replication
- Autonomous Backup

Storage Infrastructure and connectivity is monitored by our World-Class NOC 24x7, and restorations are available 8x5 NBD or 24x7, depending on customer need.

Affordable

LightBound makes Storage Services - no matter how big or small - affordable. Don't be left behind, let us work with your company to help build, manage and grow your critical storage needs.
