

VoIP Hosted PBX

LightBound provides a IP Hosted PBX for today's eBusinesses. LightBound's IP Hosted PBX solutions help businesses increase their productivity and profitability.

Minimal capital outlay for a full feature VoIP phone system

LightBound VoIP Hosted PBX Phone service featuring Fidelity trixbox Pro is now available! You can now upgrade to the latest in VoIP phone system functionality without a large capital outlay and rely on LightBound in taking over all phone system management. There are no additional costs for moves/adds/or changes and LightBound keeps all phone system software up to date.

Enterprise features for all size businesses

Fidelity trixbox Pro includes the award winning HUD application that runs on your computer and works in tandem with your VoIP Phone. LightBound Hosted VoIP Phone service includes such features as single number reach, find me follow me, auto-attendant, conference calling, Outlook integration, presence management, integrated messaging, chat, point and click transfer, conferencing, voicemail, and many other features. There is even the ability to add call center, call queues, and CRM integration (Salesforce and Sugar) for a small additional cost. So if you are a 5 person start up business with a distributed staff or 100 seat established company you can get all of the high end features to compete with the large enterprise customers.

Predictable monthly cost

If you have at least a T1 circuit connected to LightBound and 5-10 users service can be delivered for an introductory price of \$34.95/month per seat. This includes seats for hosted phone system and voice lines. Special Introductory pricing per seat on a monthly basis is also available for larger number of users as follows:

11-15 users \$30.99/mo per seat
16-25 users \$28.99
26-50 users \$25.99
51-100 users \$18.95

Phones can be leased starting at \$11.00 per month or purchased outright. Long distance cost are additional and are 3.9 cents per minute for toll-free, intrastate, and interstate calls with lower costs available for higher call volumes

We take care of support 24 x 7 x 365

LightBound meets the performance and redundancy requirements of the most demanding customers by providing operational support 24 hours a day, 7 days a week, 365 days of the year.

Our Fidelity certified trained and experienced technicians are here to help with resolving handling moves/adds/and changes and resolving circuit or PBX issues.
