MeetUp Collaboration

SECURE. CONVERGED. HD.

Communication fuels your organization, and virtual MeetUp Collaboration technology provides the engine. From one-on-one meetings to company town halls, these tools connect your employees and customers around the world. The right technology accelerates MeetUp Collaboration and allows your business to achieve its goals faster.

Web conferencing platforms from the days of flip phones and dial-up connections are no longer cutting it. Your business has evolved, and your virtual meeting tools should, too. MeetUp Collaboration is a cloud-based video and communication platform with no equipment to deploy or manage. Instead of utilizing multiple tools to communicate effectively, MeetUp Collaboration's comprehensive feature set provides video, audio, text, screen share, or file sharing functionality all in one.

MeetUp Collaboration is engineered for the way we work today - fast-paced and on the go.

THE COMPLETE PACKAGE

Video conferencing, desktop and file sharing, recording, desktop remote control – *MeetUp Collaboration* has all the tools you depend on to host effective virtual meetings. You won't sacrifice value for the price.

SCALABLE

MeetUp Collaboration supports web conferences with up to 200 participants, so you don't have to worry about having to upgrade your license if your meeting attendee list grows. Similarly, buying is simple and pricing is transparent, so you can easily scale your service as your business grows. Everyone gets the same top-notch enterprise-level experience, regardless of the size of their organization.

SHARP VISUALS

Your visual content should make an impact, not water down your message. MeetUp Collaboration image quality stands a head above other options, so your content shines.

CLEAR AUDIO

"Can you hear me OK?" Those words should never be spoken during your virtual meetings. There's nothing more embarrassing than losing your connection during an important meeting. MeetUp Collaboration is built to reduce the chance of lag time and connectivity issues.

EASY TO USE AND MANAGE

Implementing a new virtual communication tool can feel overwhelming, but MeetUp Collaboration's intuitive interface means less training and faster adoption. Getting everyone on the same page is also easy – downloads and updates are managed via the Apple App Store or Google Play Store.

MAKE IT YOUR OWN.

Forget cookie-cutter platforms. MeetUp Collaboration allows you to create a user experience that fits with your brand. This goes above and beyond simply updating your logo to also include customizing attendee communications and leveraging various features.

YOU ARE OUR TOP PRIORITY

Your MeetUp Collaboration tools should be a top priority, and your experience should be your vendor's top priority. LightBound's commitment to service and partnership are unparalleled. We provide enterprise-level solutions with personal support!

DO YOUR BEST WORK WITH MEETUP COLLABORATION.
